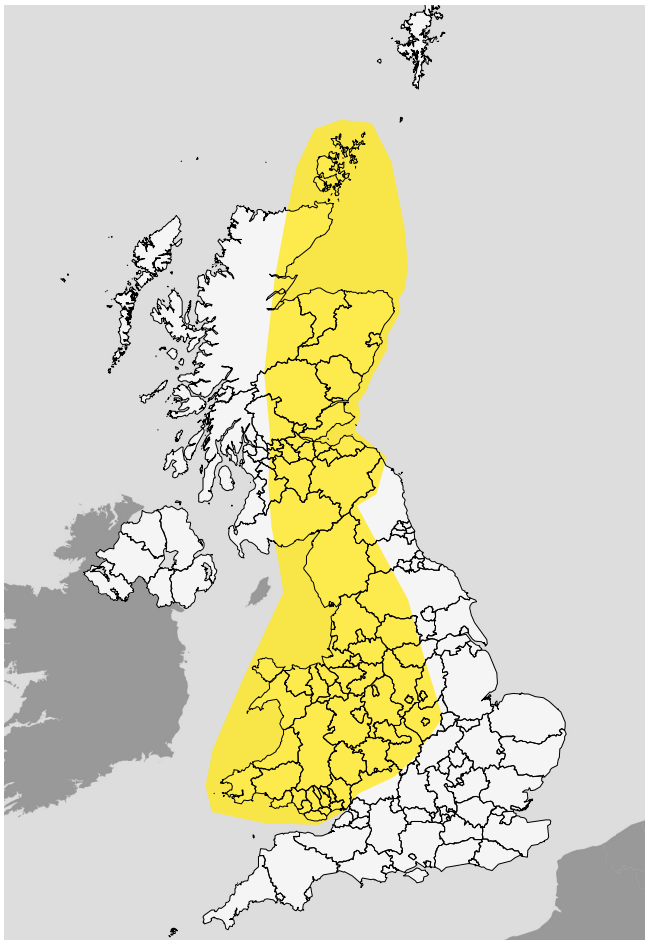
Yellow warning
Thunderstorm

Between
00:00 Mon 2 Sep 2024 and
23:59 Mon 2 Sep 2024



Whilst many places will miss them, thunderstorms may cause flooding and disruption in places on Monday.

What to expect

- Spray and sudden flooding could lead to difficult driving conditions and some road closures, with a small chance that some communities could be temporarily cut off by flooded roads
- Where flooding or lightning strikes occur, there is a chance of delays and some cancellations to train and bus services
- There is a small chance that homes and businesses could be flooded quickly, with damage to some buildings from floodwater, lightning strikes, hail or strong winds
- There is a slight chance that power cuts could occur and other services to some homes and businesses could be lost

Further details

Areas of heavy showers and thunderstorms are expected to continue to affect parts of the UK. The extent of these thunderstorms is uncertain and, whilst many places will miss them, some places may see 30 to 40 mm of rain fall in less than an hour and perhaps over 60-80 mm in one or two places. Lightning strikes will be additional hazards.

The greatest chance of impacts is across eastern Scotland this afternoon (before reducing this evening), as well as parts of Wales and the West Midlands, where the risk continues into the first part of Monday night.

Very low likelihood of medium impacts

Further Details (continued)

What should I do?

Consider if your location is at risk of flash flooding. If so, consider preparing a flood plan and an emergency flood kit.

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

People cope better with power cuts when they have prepared for them in advance. It's easy to do; consider gathering torches and batteries, a mobile phone power pack and other essential items.

If you find yourself outside and hear thunder, protect yourself by finding a safe enclosed shelter (such as a car). Do not shelter under or near trees, or other structures which may be struck by lightning. If you are on an elevated area move to lower ground.

Be prepared for weather warnings to change quickly: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.

Reason for update

Warning area updated to remove parts of northeast England. Text updated to place greater emphasis on hazards across eastern Scotland, Wales and parts of central England.
